

A Dancer's Eclipse

Act 1 — Opening Reveal

“Wide stage. Top-down spotlight turns on. Elegant woman stands center in midnight gown. Mist begins to rise around her feet. 50mm shallow depth lens. Camera dolly-in from stage right. Her silhouette sparkles under soft starlight.”

Act 2 — Spiral Lift

“She raises her right arm and slowly spirals left. Gown spins outward like flowing moonlight. Gimbal-mounted camera arcs around her, counterclockwise. Stars twinkle subtly above. Light flares through star filter.”

Act 3 — Silhouette Lunge

“She lunges forward into full extension. Gown brushes mist below. Backlight flares, creating strong silhouette. Steady cam pushes low from knee height toward her. Motion is fluid and radiant.”

Act 4 — Floorwork Glow

“She lowers gracefully into floorwork. Arms sweep glowing lines through mist. Macro lens on slider tracks left to right, close to ground. Light blooms softly around fingertips. Haze wraps her frame.”

Act 5 — Turning Orbit

“She rises into two slow turns. Dress trails in circular pattern. 360° rig orbits around her as she spins. LED star-lights pulse in sync. Orbit camera tracks level at shoulder height.”

Act 6 — Moon Reach

“She extends high *développé* to the sky. Gown unfurls like slow flower. Vertical jib rises alongside her motion. 85mm lens creates soft-focus backdrop. Moonlight patterns shimmer across fabric.”

Act 7 — Contraction Zoom

“She folds into sharp contraction. Lighting shifts to blue. Fog bursts at her feet. Handheld camera whip-pans in for emotional close-up. Snap-zoom to face. Mist glows behind her.”

Act 8 — Celestial Turns

“She bursts into pirouettes. Three rotations. Gown trails like a comet. Steadicam moves backward in tight spiral. Light trails added in post to enhance motion. Spiral blur transition begins.”

Act 9 — Star Drift

“She slows, arms flow like ribbons. Stars shimmer above her. Drone descends diagonally, framing dancer and night sky. 24mm wide lens. Elegant, floating motion across frame.”

Act 10 — Fade to Halo

“She reaches up. Final pose. Moon forms halo behind her. Dolly-out through mist. Camera tilts up to reveal stars. Long dissolve begins. She vanishes into starlight.”

Each act is **under 20 words of action**, with clear scene structure, dynamic movement, and camera notes ideal for Runway’s AI video composition. Want me to output this in a file, or align it with motion prompts or audio beats? Just say the word.
